

filing under 35 U.S.C. 371 claiming priority to international patent application number PCT/SE96/01464, filed November 13, 1996, the entire disclosure of which is incorporated herein by reference, now issued as United States Patent Number 6,337,185.

In the Claims

Please amend claim 11 as follows:

11. (once amended) A kit for use in analyzing the sequence of a polynucleotide of interest comprising:
- (a) a solid support,
 - (b) two amplification primers comprising one member of a specific binding pair, the member being of the same type for both primers,
 - (c) sequencing primers.

Please amend claim 12 as follows:

12. (once amended) [A]The kit according to claim 11, [characterized in that]wherein the solid support is a manifold having a plurality of individual solid phase members and [that]wherein the sequencing primers are differently labelled.

Remarks

Claims 11 and 12 are pending in the captioned application. Applicants have
